

BERNARD JULVE

DIRECTOR, DEVELOPMENT

PROFESSIONAL EXPERIENCE

Computer Science graduate with 11+ years in software development including: primary full stack developer on a web portal product; leading a scrum team utilizing Agile methodologies as a senior developer; and currently managing 2 teams along with analyzing and optimizing the architecture of multiple projects as a director.

WORK EXPERIENCE

HealthStream | Director, Development (San Diego, CA) *Jan 2023 - Present*

- Manage 2 development teams, improve DevOps, design/lead projects.

Verity, A HealthStream Company | Team Lead (San Diego) *Jan 2019 - Jan 2023*

- Incorporated features addressing client ratings from surveys including redoing our site navigation bar and layout.
- Replaced a WCF service with a more efficient data layer and supervised the implementation of a Windows service for long running tasks.
- Managed and maintained a contractor project integrating 3rd party e-signature entities such as DocuSign into our web portal.
- Used monitoring tools to identify bottlenecks/optimize site performance.
- Moved web app to multi-tenant model to satisfy maintenance needs.

Echo, A HealthStream Company | Sr. So. Dev. (San Diego) *Oct 2015 - Jan 2019*

- Led junior developers, assessed sprint progress, and improved work processes such as streamlining our post release delivery pipeline.
- For our web portal: added comprehensive error logging to the database, rewrote multiple web forms into single page applications, and updated the solution to .NET MVC to better meet client demands.
- Met with a customer, gathered project specs, and rewrote our Update Profile product into a single page application to fulfill a client request.

HealthLine Systems | Software Developer (San Diego) *Jul 2012 - Oct 2015*

- Created a custom control to tabulate data with sort and filter functions.
- Created a WCF web service used by a 3rd party to integrate ophthalmic equipment data into HealthLine user databases.
- Researched and implemented required enhancements for our affiliated EHR solution to pass Meaningful Use Stage 2 certification (MU2).

Composite Software | QA Intern (San Mateo, CA) *Jun 2011 - Aug 2011*

- Analyzed files for scripting, refactoring, testing, and release management.
