Developing digital products for the largest industries in the world can present unique situations and complex challenges. As a professional of designing integrated digital systems, it is essential to use effective communication and organization to fulfill business requirements.

Technical Experience

C#, SQL, Javascript, CSS, .NET Core, OAuth 2.0, OIDC 1, MVC, MVVM, EF Core, Service Bus, Redis, GIT, Jenkins, REST, SOAP, HTML, gRPC

Work Experience

BMTX Senior Software Developer: April 2023 to Present

- Member of a team tasked with migrating a legacy application to a multi-tenant micro service application utilizing gRPC and REST
- Participate across multiple teams and assist with migrating business logic to the company next generation application
- Conduct requirements gathering for missing features while estimating tasks and prioritizing features within a development sprint
- Updated IDP authentication process to collect usage data for authenticated and unauthenticated users
- Designed and developed user management services to help reduce the cost of inbound customer service calls
- Developed a custom OTP implementation utilizing SMS and used across multiple application workflows and authentication MFA
- Integrated custom fraud detection and prevention using guidance from the internal InfoSec department
- Developed a REST API service for internal applications to interface with next generation service features
- Integrated with Identity Server 4 to implement OIDC standards and utilized Azure APIM to manage JWT access tokens and application authorization
- Created an internal wiki for common development standards used across a microservice architecture

Global DMS Senior Software Developer: April 2015 to April 2023

- Developed a reporting system capable of producing custom reports and scheduling exports over SMTP
- Developed a custom extract, transfer, and load process utilizing Azure Service Bus to migrate data between multiple databases
- Developed a customizable workflow layer allowing clients to manage sub system processes and automate routine tasks
- Developed an import payment process to batch and submit multiple transactions while processing responses over the ACH network
- Developed multiple features to expand and enhance a proprietary SAAS application across integrated domains of a monolithic application

Devon International Group Lead Software Developer: January 2014 to April 2015

Employed as the lead software developer for the Medical Claims and Negotiations department, and acted as the main liaison between product management and IT.

NSM Insurance Group Junior Software Developer: November 2012 to December 2013

Employed as a junior software developer for the IT development team while designing and maintaining internal applications across multiple insurance lines of business.

Frontline Technologies Software Development Intern: June 2012 to August 2012

Recruited as a development intern with the purpose of expanding on programming knowledge, and acquiring the skills required to work as a member of an agile development team.

U. S. Army Cannon Crewmember: April 2002 to July 2009

Enlisted as a Cannon Crewmember achieving the rank of E-5 (Sergeant), and serving 3 tours of duty in Iraq. Honorably discharged after completing an initial enlistment contract.

Education

Bachelor of Science, Simulation and Programming

DeVry University

Graduated: October 2012

GPA: 3.89 / 4.00
