# Jonathan Nguyen

(209)986-5183 | Jonathan.r.nguyen03@gmail.com | Linkedin | Portfolio

### EDUCATION

University of California, Santa Cruz

Bachelor of Science in Computer Science

Sep. 2021 - Dec 2023

University of California, Berkeley

Masters in Cybersecurity

Berkeley, CA

Santa Cruz, CA

Jan. 2024 - Jan. 2026

#### EXPERIENCE

## Software Engineering Intern

Santa Clara, CA

June 2022 - Present

Intel Corporation

- Reduce technical debt within Intel data centers by developing and refining internal tools with Python and Linux
- Increase efficiency for physical touch work by providing remote access to metadata for a given data center using Python
- Monitor and transport client storage tapes via Iron Mountain and Intel API
- Restore an average of 50 client servers a day using Linux and remote interfaces

## Software Engineering Intern

Stockton, CA

Prelim

Jul. 2020 - March 2022

- Organized client information into excel spreadsheets for easy contact and quick reference
- Increased client application process efficiency by building digital applications in the Prelim interface using React and Node.js
- Mapped fields from digital applications to the corresponding PDF fields to generate usable documents with adobe tools

#### Projects

In the Kitchen | React Native, Node.js, Express.js, MongoDB, AWS Elastic Beanstalk

June 2023 – July 2023

- Managed and coordinated meetings, tasks, and planning for the team project using Agile/Scrum Methodologies
- Developed a full-stack platform to centralize communication in the Pickle Ball community
- Provides users with direct messaging capabilities and a friend system using a combination off long-polling and web sockets
- Supports image uploads as posts to the home page or changes to a user profile using MongoDB and Express.js

Meetcode | React.js, CSS, Express.js, Node.js, MongoDB, Socket.io

May 2022 – June 2022

- Pairs users to solve common coding interview type questions using sockets and Express.js
- Developed a user-friendly web interface using React.js and CSS
- Stores user authentication and profile information in MongoDB with password salting and encryption for enhanced security
- Supports a shared editor for users to utilize together with flexibility in languages

**Discord Q&A AI** | Python, Discord.py, Natural Language Processing

October 2021 – December 2021

- Removes redundancy in large servers by responding to questions asked with a link to similar questions previously asked
- Distinguishes a sentence as a question by removing stop words and analyzing key words via natural language processing

## TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, HTML/CSS, Swift Frameworks: React, React Native, Node.js, Linux/Unix, Express.js Developer Tools: Git, Docker, VS Code, Visual Studio, Eclipse

Other: Computer Networking, Data Structures and Algorithms, Agile, Scrum
